

ARE YOU UNKNOWINGLY SUPPORTING ABORTION?

Many pro-life advocates unknowingly own - and may actually be profiting from - investments that support abortion!

Today in America, hundreds of corporations are involved in the business of abortion. Some perform abortions in their facilities, others produce abortifacients, and many provide funding to pro-abortion organizations.

As a matter of fact, over 20% of the stocks inside the nation's largest mutual fund are of companies involved in abortion!

Many of the investments people commonly use these days are a part of the economic system that supports these corporations.

At DAN HARDT FINANCIAL SERVICES, we use state-of-the-art investment strategies for our clients while also avoiding companies involved in abortion (as well as pornography and other issues). We do this as a part of our goal to help clients make sensible and moral investment decisions even in unsettling economic times like these.

Are your investments pro-life? We are able to provide audits for most of the stocks or mutual funds you currently own.

You *can* do something about this. We would like to help.
